

Safe City

Your Municipal-Command & Control suite for routine and emergency management

Facing threats to public safety and critical infrastructure has become a main mission of security agencies and municipalities around the world. Continuous effort to maximize security and minimize crimes has become an essential component in today's citizen expectation (municipality's road map).

TSG's Safe city System makes the public security infrastructure smarter through improved integration with computing capabilities and networking. This enables public security organizations to collect, share and analyze data more effectively, in real time and in retrospect, thus make better enforcement and emergency decisions.

The performance of an extensive analysis of the client's security needs and existing infrastructure before designing the solution is of essence, each customer gets a tailor-made solution to his needs. The security means (Sensors) is set per each secured site perimeter. This also includes planning municipal security operation concept and training response teams program.

Our approach is designed to help agencies raise their situational awareness to build a common operational picture of the situation in the city, thanks to real-time data fusion system developed by TSG we monitor, detect, identify and alert in order to provide an integrated urban situation picture for easy decision making.

System Components:

Sensors

- Video surveillance
- Bi-directional audio (intercom)
- Panic buttons
- Video analytics (sixth sense)
- LPR
- Access control solutions
- Open sources (social networks) intelligence

Command & Control Center

- Call Center - Phone calls, emails, Web access
- Common Operational Picture
- Real time video display
- Event management
- GIS - Sensors, Mobile unit locations (GPS)
- Decision support tools
- Resources management
- Recording & Debriefing
- Dispatching through dedicated centers

Mobile Units

- Hand held, Vehicle
- GPS
- Communication
- Real Time information sharing: Text, Pictures, Video; Missions & Routes

Communication Infrastructure

- Land lines, Fiber optics
- Wi-Fi
- Satellite Communication
- Cellular
- Any other IP network

TSG is a global provider of C4ISTAR solutions, With over four decades of experience. TSG specializes and has a proven track record in designing, developing, supplying and integrating advanced, comprehensive and highly innovative solutions and systems for the defense and homeland security sectors. Dedicated to delivering cutting-edge, best-of-class solutions, TSG serves a diverse client base of governmental organizations worldwide.
